Project Update: Progress Across Key Work Packages

The PERFORM Project is advancing steadily in its mission to support inclusive employment practices for neurodivergent individuals in the hospitality sector

Project Management and Dissemination (WP1)

The coordination has continued smoothly, supported by an effective dissemination strategy. Regular updates, i.e. in Facebook, have helped raise awareness and share project milestones with a wider audience.

HR Platform Development (WP3)

The HR Platform, designed to help employers create inclusive workplaces, reached an important milestone with the release of its alpha version. Testing was completed, and improvements are being implemented based on feedback.

Toolkit and VET Course Development (WP4)

PERFORM Toolkit was finalized and assessed in workplace conditions. A Diary Tool designed for autistic employees was also developed, evaluated, and digitalized.

Next Steps

The next phase will focus on continuing platform development and finalizing the VET course. This includes designing the methodology, curriculum, and training materials, along with translating them into all partner languages.

The PERFORM Project remains on track to deliver tools and training that promote diversity, inclusion, and improved employment outcomes in hospitality.

Stay tuned and keep on visiting the project's website perform.erasmus.site, as well as our Facebook page [@Perform Project](https://www.facebook.com/PerformProject).
